## SKILLS

- Product Deployment & DevOps Skills
- Domain Adaptability
- Critical Thinking
- Modern Full Stack Architecture
- Project Management & Autonomy

## LANGUAGE

- English
- Afrikaans

## ABOUT ME

A Developer who understands the hardware underneath the code. Starting with PC building and repair at 16, I transitioned into Full Stack Web Development and am now studying my BSc Cybersecurity at La Trobe University. I combine a builder's mindset with a focus on security to create efficient web applications. I am currently working toward my CCNA and plan to pursue my Master's degree to further specialize in securing digital infrastructure.

## WORK EXPERIENCE

### Freelance AI & ML Developer 2025 – 2026

I conducted AI research and generated technical reports and findings. I developed web-based applications including a fleet tracker and a signing app while creating AI video content and providing general IT support.

### Freelance Web Developer 2026 – Present

I design and develop custom websites and web applications for local businesses and individuals. I provide ongoing technical support and deliver efficient digital solutions tailored to client needs.

## EDUCATION

### Port Shepstone High School 2019 – 2023

National Senior Certificate

### CTU Training Solutions 2024 – 2025

Certificate in Programming Foundation

### La Trobe University 2025 – Present

Bachelor of Science in Cybersecurity
