- Development: Full Stack Web, Web Apps, Android & Windows Apps
- Methodology: DevSecOps, Strategic Master Planning, Critical Thinking

LANGUAGE

- English
- Afrikaans

ABOUT ME

A curious, analytical, and highly driven Cybersecurity and Programming student at La Trobe University. Passionate about AI and IT with a deep thirst for understanding how complex systems operate. I use AI daily to build cost-effective solutions, leveraging master plans and realistic goals to turn concepts into functional tools. I thrive in environments where I can experiment, build, and optimize workflows using emerging technologies like Claude.

WORK EXPERIENCE

AI & Automation Contractor
2025 – 2026

Engineered and deployed multi-agent workflows utilizing Claude and Kilo Code to automate complex business processes. Analyzed and routed tasks across various AI models based on token costs and model strengths to implement cost-effective solutions.

Freelance AI & ML Developer
2026 - Present

Conducted AI research and generated technical reports and findings. Developed full-stack web-based applications, including a fleet tracker and a digital signing app.Created AI video content and provided general IT support. Design and develop custom websites and web applications for local businesses and individuals.

EDUCATION

Port Shepstone High School
2019 - 2023

National Senior Certificate

CTU Training Solutions
2024 - 2025

Certificate in Programming Foundation

La Trobe University
2025 - Present

Bachelor of Science in Cybersecurity
